

## BREAKFAST SEMINAR HOSTED BY REMORA

On Wednesday November 4, 2009, Remora hosted a HiLoad DP breakfast seminar in Houston, where 30 representatives from leading engineering, classification and tanker companies were updated on technologies and operational philosophies within the area of offshore loading systems.

The seminar was organized as part of Remoras commitment to the industry and its professionals, focusing on safe operation, risk mitigation and operational optimization.

The Remora team also had an opportunity to address the commercial potentials with regard to the HiLoad DP solution, where competitive lease models are currently being offered to the market

“Remora highly appreciates the valuable and very positive feedback received on the presented HiLoad DP solution as the audience basically represents a group of people who provides technical, operational and commercial advice to leading players within the Oil and Gas industry” says Remora’s Kim Diederichsen, Senior VP Americas.
